SUMMARY

AI Product Manager (MS, AI in Business) who ships production GenAI and the reporting layer behind it. First AI hire at ESC: launched **Maya AI** in **2.5 months** plus the cockpit measuring it, tracking confidence, sentiment, and takeover as KPIs for a **200K-resident utility**. **Drawn to Morgan Stanley because DevGen.AI saving 280,000 developer hours is a numerator, and showing what those hours converted into is the work worth owning.**

PROFESSIONAL EXPERIENCE

AI Product Manager ESC Partners

January 2026 to Present
Rochester, New York

- **Defined the KPIs and built the reporting surface for a production GenAI platform.** Shipped the **Maya AI** supervisor cockpit: per-response confidence scoring, live sentiment, agent performance tracking, and one-click human takeover, used daily by non-technical utility operations managers. Containment, confidence, and takeover frequency became the reported measures of quality; **70 to 80%** of first-touch volume now runs autonomously.
- **Designed governance in rather than bolting it on later.** Human-in-the-loop approval routed through **Microsoft Teams** adaptive cards, so a named person signs off before the agent acts, alongside **17 admin APIs**, 24-hour key rotation, and DynamoDB tenant governance isolating three utility deployments. Turned supervisor workflows into the data definitions operations now reports on.
- **Owned Maya AI end to end as the first AI hire**, architecture through launch in **2.5 months** on FastAPI, AWS Bedrock, n8n, React, and Claude Code. Live at a **200K-resident utility** with roughly **\$225K per month** in projected savings, now rolling out at two further utilities.

AI Product Consultant Senior Assisted Living Locators

October 2025 to January 2026
Remote

- **Shipped an AI recommendation product for 5 advisors** handling **300+ weekly consultations**, matching families to **250+ communities** in under **2 seconds**. An 8-factor model with a two-phase pre-filter cut **API cost per consultation** roughly **70%** while holding match quality across the advisory team.

Graduate AI Product Intern Ain Center for Entrepreneurship, University of Rochester

January 2025 to December 2025
Rochester, New York

- **Built VentureForge**, an internal AI strategy simulation and self-serve validation tool for **50+ MBA students** and **200+ founders**. It retired **\$25K per year** of licensed software and cut mentor preparation time by **75%**.

Co-Founder CloudApproach and Approachables (Acquired)

July 2019 to March 2024
United Kingdom + MENA

- **Bootstrapped and exited two ventures** across UK and MENA: **\$575K combined**, **95%** post-acquisition retention, **200+** agency clients, **80+** real-estate partners, and **\$5M+** in deals influenced.

EDUCATION

Simon Business School, University of Rochester Master of Science in AI in Business (STEM-Certified)

New York
December 2025

Leadership: Vice President, Masters Advisory Council. Simon Strong Community Builder Award.

University of Central Lancashire Bachelor of Arts (Honors), International Business and Management

Preston, United Kingdom
May 2020

PROJECTS

- **VaultIQ, air-gapped financial intelligence platform:** Claude Opus on AWS Bedrock running inside the customer VPC, so analyst documents never leave their boundary. Extracts line items and surfaces period-over-period trends, with SSO and role-based access deciding which analysts see which slices.
- **City of Rochester Fraud Detection (Simon Vision Consulting):** Explainable ML model (**XGBoost** with **SHAP** attribution) lifting accuracy from **62% to 73%**, built so a loan officer could see why any one application was flagged.

SKILLS

Product and Data: KPI Definition, Data Standards, Data Quality, Dashboards and Reporting, Adoption and Usage Metrics, Benefit Realization, Prioritization (RICE and MoSCoW), Product Strategy, Customer Discovery, PRDs and Requirements Definition, Senior Stakeholder Communication.

AI and Stack: Claude Code, AWS Bedrock, Claude (Opus, Sonnet, Nova), LLM Evaluation, RAG, Intent Classification, Human-in-the-Loop Approval Design, Multi-Tenant Governance, Python, SQL, FastAPI, React, Next.js, n8n, Postgres with pgvector, DynamoDB, Terraform, Microsoft Teams.
