SUMMARY

AI Product Manager (MS, AI in Business, STEM, Simon Business School). Ships enterprise AI inside the customer security perimeter on **Claude Code: VaultIQ** runs Claude Opus inside the customer VPC with no data egress; **Maya AI** runs as a multi-tenant agent on Microsoft Teams and Outlook for a **200K-resident utility**. Owned both at ESC in **2.5 months**. Two prior exits totaling **\$575K, \$5M+** enterprise deals influenced. **Drawn to Sarvam because on-device sovereign AI is the biggest moat (Sarovam Kaze, silicon with Qualcomm + Intel + NVIDIA), and the surface overlaps directly with what I already ship: air-gapped Claude Opus, multi-tenant SaaS with role-based access, HITL agentic workflows on Microsoft Teams.**
