

Dear Vivek, Pratyush, and the Sarvam team,

Just applied to the Product Manager role. The line in the JD that pulled me in is "ship product every week, not plans." That is the only mode I work in, and the work I want to keep doing.

I am the first AI hire at ESC Partners. I built **Maya AI** from scratch in **2.5 months** on Claude Code: an autonomous, event-driven agent on Oracle CCS that unifies voice, chat, SMS, email, and mobile for a **200K-resident utility**. I wrote the customer discovery notes, the INVEST stories, the FastAPI handlers, the n8n workflows, the React supervisor cockpit, the supervisor-facing copy, the Teams adaptive cards, and the Bedrock routing config. No layers. The model selection across Claude Opus, Sonnet, and Nova is tuned on cost-latency-accuracy tradeoffs; new models go through a two-week shadow channel before they touch production traffic. Confidence, sentiment, and takeover frequency run as service-level objectives.

On the analytics side: I built the funnel and the dashboards inside Maya AI on DynamoDB telemetry and a React cockpit. I have not personally shipped PostHog or Mixpanel into production, but the funnel-instrumentation reflex is the same: define the metric before the feature, watch the metric after every release, cut what does not move it. PostHog is a one-day ramp.

Two products in parallel show the same pattern. **SALL**: an AI recommendation engine for 5 senior-care advisors processing **300+ weekly consultations** against **250+ communities**. 8-factor scoring, two-phase pre-filter, **~70%** API cost reduction. **Career-Ops**: a Claude Code harness that scans job portals, evaluates JDs against my profile, generates tailored applications, and tracks outcomes end-to-end. Both shipped solo, both on Claude Code, both in the "side projects and shipped personal products" bucket your nice-to-haves call out.

Before ESC, I bootstrapped and exited two ventures across UK and MENA (**\$575K combined exit, 95% post-acquisition retention, \$5M+** in deals influenced on a **\$200K** marketing budget). Founder mode is the only mode I have ever operated in.

One open question I would love to discuss in screen one: the JD lists Bengaluru on-site. I am US-based on STEM OPT through 2027 and willing to relocate. If there is any remote-from-US flexibility for the first 6 to 12 months while the seat ramps, I would love to know. If it is hard Bengaluru, I would still rather have the conversation early than miss the role.
