

LinkedIn Messages: Sarvam AI Product Manager

Personalized DMs for Sarvam's two co-founders. Sarvam's careers page does not list a hiring contact for this seat, so the founders are the right entry points. Pratyush is the more reachable and technical; Vivek is the more public-facing.

Pratyush Kumar, Co-founder of Sarvam AI (ex-AI4Bharat, ex-IBM Research)

Short (connection request)

Hi Pratyush, just applied to the generalist PM role at Sarvam. I'm the first AI hire at ESC, where I built Maya AI end-to-end in 2.5 months on Claude Code: autonomous agent on Oracle CCS for a 200K-resident utility. Ship-every-week mode is the only one I work in. Would love to connect.

Hi Pratyush,

Just applied to the Product Manager role at Sarvam. Reaching out because the JD line "ship product every week, not plans" is the only mode I have ever worked in, and the substance match between what Sarvam is building and what I run at ESC is uncommonly close.

I'm the first AI hire at ESC Partners. Built Maya AI from scratch in 2.5 months on Claude Code: an autonomous, event-driven agent on Oracle CCS for a 200K-resident utility. Multi-channel (voice, chat, SMS, email, mobile). 11 Labs 26-language voice. Bedrock routing across Opus, Sonnet, Nova on cost-latency-accuracy tradeoffs. Confidence + sentiment + takeover frequency tracked as SLOs. I wrote the spec, the FastAPI handlers, the n8n workflows, the React cockpit, the Teams adaptive cards, the supervisor copy. No layers.

On the side: Career-Ops is a Claude Code harness I run for my own job pipeline (public on GitHub). VaultIQ is an air-gapped Claude Opus product I spun off at ESC. Both fit the "side projects and shipped personal products" bucket your nice-to-haves call out.

Before ESC, I bootstrapped and exited two ventures across UK and MENA (\$575K combined exit, 95% post-acquisition retention). Founder mode is the only mode I have ever operated in.

One open question I would value your honest read on: the JD says Bengaluru on-site. I am US-based on STEM OPT, willing to relocate, but would love to know if there is any remote-from-US flexibility in the first 6 to 12 months. Either way, the substance match is real and I would rather have the conversation early.

Shivam

Vivek Raghavan, Co-founder and CEO of Sarvam AI (ex-AI4Bharat, ex-CPM UIDAI/Aadhaar)

Short (connection request)

Hi Vivek, just applied to the generalist PM role at Sarvam. The Aadhaar architecture work is one of the public-infrastructure builds I have studied most closely. Currently shipping a customer-side analog at ESC: Maya AI, 26-language voice, 200K residents, end-to-end in 2.5 months. Would love to connect.

Hi Vivek,

Just applied to the Product Manager role at Sarvam. Reaching out because Sarvam is the public-infrastructure-scale bet I want to be inside next, and the JD describes the only mode I have ever worked in.

I am the first AI hire at ESC Partners. Built Maya AI from scratch in 2.5 months on Claude Code: an autonomous agent on Oracle CCS for a 200K-resident utility. 26-language voice on 11 Labs. Bedrock routing across Claude Opus, Sonnet, Nova. Confidence + sentiment + takeover frequency as service-level objectives. I owned every layer: customer discovery, INVEST stories, FastAPI handlers, n8n workflows, React cockpit, Teams adaptive cards, supervisor copy. No hand-offs. Shipped weekly for 10 weeks straight.

The Aadhaar architecture work you led at UIDAI is one of the public-infrastructure builds I have studied most closely. Sovereign Indic-first AI feels like the next chapter of that story, and the generalist PM seat sits at the layer where the spread compounds fastest.

Before ESC, I bootstrapped and exited two ventures across UK and MENA (\$575K combined exit, 95% post-acquisition retention, \$5M+ in deals influenced on a \$200K marketing budget). Founder mode is the only mode I have ever operated in.

One honest question for screen one: the JD lists Bengaluru on-site. I am US-based on STEM OPT through 2027, willing to relocate, but would love to know if the seat has any remote-from-US flexibility in the first 6 to 12 months. Either way, I would rather raise it now than later.

Shivam

Notes

- Pratyush is more technical and tends to engage on substance; lead with him.
- Vivek is more public-facing; the Aadhaar reference is the genuine personal anchor.
- The Bengaluru-on-site question is non-trivial. Do not bury it. Surface it in the first message so neither side wastes time.
- Mention the application explicitly in every version so context lands fast.
- If hiring manager surfaces during the interview loop, copy the long version and replace the founder-specific anchor with one role-specific line.
