## PROFESSIONAL EXPERIENCE

### AI Product Manager/Engineer ESC Partners (Hometown Hub)

January 2026 – Current  
Rochester, New York

- **Built the full AI operating layer for Maya AI** on Oracle CCS — an agentic platform unifying voice, chat, SMS, email, and mobile that autonomously executes account, billing, payment-plan, and outage workflows; handles **70–80%** of first-touch volume across every channel.
- **Owned the LLM evaluation framework and observability cockpit** — AWS Bedrock model routing across Claude Opus, Sonnet, and Nova Pro tied to per-intent cost, latency, and CSAT SLOs; one-click HITL takeover, real-time sentiment, and confidence scoring deployed for non-technical supervisors at NEP (**200K+** residents) with active rollouts at Moreno Valley Electrical Utility and Delta Utilities.
- **Owned product strategy for the RAG pipeline and AI governance layer** — shipped **VaultIQ**, an air-gapped Claude Opus + Postgres/pgvector platform inside the customer VPC with Terraform-defined deploys, deterministic HITL fallbacks, **24-hour key rotation**, and **17 admin APIs** for least-privilege tenant governance; built end-to-end in **2.5 months** as sole AI hire.

### AI Product Manager/Engineer Senior Assisted Living Locators

October 2025 – January 2026  
Remote, California

- **Built an AI recommendation product for 5 senior-care advisors** processing **300+ weekly consultations**, matching families to **250+** community options in under 2 seconds — decision-support workflow embedded in advisor intake calls and CRM updates.
- **Designed an 8-factor scoring algorithm** combining business rules with AI analysis to rank communities by budget fit, care needs, and proximity; cut API costs **~70%** via two-phase pre-filtering with real-time voice transcription on every advisor intake call.

### AI Product Manager/Engineer Vollie, Inc.

May 2025 – December 2025  
Buffalo, New York

- **Owned 0-to-1 MVP** of voice AI coaching platform as **sole PM**; landed the **first paying client (30 employees)**, triggered a seed-funding milestone, and ran concept-through-launch end-to-end.
- **Designed a closed-loop voice engine** with real-time transcription, sentiment and commitment scoring, and auto-generated reports — peer accountability without a live human facilitator.

### Founder CloudApproach and Approachables (Sold)

July 2019 – March 2024  
United Kingdom + MENA

- **Bootstrapped and sold two ventures for \$575K combined** with **95%** post-acquisition retention; managed a **\$200K** marketing budget influencing **\$5M+** in closed deals across UK and MENA; aligned **200+** agency clients and **80+** real-estate partners on roadmap priorities.

## EDUCATION

### Simon Business School, University of Rochester Master of Science in AI in Business (STEM-Certified)

New York  
December 2025

*Leadership: Vice President, Masters Advisory Council & Simon Strong Community Builder Award.*

### University of Central Lancashire Bachelor of Arts (Honors), International Business and Management

Preston, United Kingdom  
May 2020

## PROJECTS

- **City of Rochester — Fraud Detection ML System via Simon Vision Consulting:** Built explainable ML model (XGBoost, SHAP) for loan-officer decision support; lifted accuracy from **62% → 73%** while improving review-staff transparency on every flagged case.

## SKILLS

**Product Management:** Agentic AI Strategy & Roadmap, LLM Evaluation Framework, RAG Pipeline Ownership, AI Safety & Governance, HITL Design, Discovery, PRDs, User Stories & Acceptance Criteria, SLOs / KPIs (cost, latency, CSAT), Stakeholder Alignment, Prioritization (RICE, MoSCoW), Agile/Scrum.

**AI, Platform & Operations:** Claude Code, AWS Bedrock, Claude (Opus, Sonnet, Nova), Prompt Engineering, Caching, Model Routing, Observability, Incident Management Integrations, Runbook Automation, Postgres/pgvector, Terraform, FastAPI, n8n, Oracle CCS, REST/OpenAPI, OAuth2.
