Hiring Team
WisdomAI
San Mateo, California

Dear WisdomAI Hiring Team,

Your job description reads like the work I already do. Builder, empath, executor — I write code, run customer discovery, make architecture trade-offs, and ship features end-to-end. I am applying for the Product Manager role on the WisdomAI team.

At ESC Partners I built **Maya AI**, the AI operating layer behind a **200K+** resident utility on Oracle CCS, end-to-end as the sole AI hire in **2.5 months**. Maya unifies voice, chat, SMS, email, and mobile and autonomously executes billing, payment plans, start/stop service, and outage workflows; it handles **70–80%** of first-touch volume. I owned the AWS Bedrock routing layer (Claude Opus, Sonnet, Nova Pro), the cost / latency / CSAT eval grid, the multi-tenant governance plane (**17 admin APIs** + DynamoDB tenant audit), and the supervisor cockpit (real-time sentiment, confidence scoring, one-click takeover). It is live at NEP, rolling out at Moreno Valley Electrical Utility, and piloting at Delta Utilities.

The closest thing on my track record to WisdomAI is **VaultIQ**, an air-gapped financial intelligence platform on Claude Opus + Postgres/pgvector that runs entirely inside the customer VPC, with Terraform-defined per-customer deploys. It is the regulated-finance answer to BI — semantic retrieval over heterogeneous analyst documents, business-question UX, role-based access. I shipped it as a side track to Maya at the same firm. On Senior Assisted Living Locators I cut API spend **~70%** on a 300+ weekly consultation product through two-phase pre-filtering — the same unit-economics thinking I would bring to your data plane.

I am the kind of PM who sees myself as an extension of the dev team. I will spend the first weeks observing customer workflows, write specs in code and prompts, and unblock engineers by writing the proposal and the test cases together. Two prior exits (\$575K combined, \$5M+ deals influenced, 200+ clients) trained the founder discipline that backs every product call.

I am open to relocate to the Bay Area for this role. Visa: STEM OPT through 2027, H-1B eligible — happy to confirm sponsorship policy in our first conversation.

You can see Maya behind a [live SALL demo](#), a [walkthrough video](#), and the rest of the work at shivamportfolio.webflow.io. I would love to talk about what is next on the WisdomAI roadmap.

Sincerely,
Shivam Sharma
