

LinkedIn Messages: Bobbyard, Product Manager

Personalized DMs for the people named on the Bobbyard job page. Short version fits a LinkedIn connection-request note; long version is for InMail or a post-connection follow-up. Copy whichever fits straight into LinkedIn.

Michael Ding, Founder & CEO of Bobbyard

Short (connection request)

Hi Michael, just applied to Bobbyard's founding PM role. I'm the first AI hire at ESC, where I built Maya AI in 2.5 months: an autonomous agent on Oracle CCS for a 200K-resident utility. Same vertical-AI pattern you're running on construction. Would love to connect.

~290 characters

Long (InMail or post-connection)

Hi Michael,

Just applied to Bobbyard's founding PM role. Sending this because the JD reads like the work I'm already doing, and I want to make sure the application lands.

Six months ago I joined ESC Partners as their first AI hire. Built Maya AI from scratch in 2.5 months on Claude Code: an autonomous agent on Oracle CCS that handles voice, chat, SMS, email, and mobile for a utility with 200K+ residents. Same structural pattern as Bobbyard's bet on construction. Manual expert work that should take minutes, not days. Live at NEP, rolling out at Moreno Valley Electrical, piloting at Delta Utilities.

Before ESC, I bootstrapped and exited two ventures across UK and MENA, \$575K combined. Founder's the only mode I've ever run in.

Would love a quick conversation if there's room. Happy to walk you through Maya AI in code or share whatever else would help.

Shivam

Lillian Chuang, Product Manager at Bobbyard (recently hired)

Short (connection request)

Hi Lillian, just applied to the PM role at Bobbyard. Saw you joined recently and I'd love 15 minutes to hear how the first 30 days actually went. I'm the first AI hire at ESC building Maya AI, so the early-PM scrappiness rings familiar.

Long (InMail or post-connection)

Hi Lillian,

Just applied to the PM role at Bobbyard. Sending this because you joined recently and I'd love 15 minutes of your time if you can spare it.

I'm the first AI hire at ESC Partners, where I built Maya AI from scratch in 2.5 months: an autonomous agent

platform on Oracle CCS, live at a 200K-resident utility. The "noise to signal to ship" rhythm from Bobbyard's JD is exactly how my days look right now. Something tells me your first 30 days at Bobbyard had a similar shape, and I'd love to hear how you found it.

No agenda. Just trying to learn from someone who's actually walked in the door recently. Coffee on me whenever you're in SF, or a Zoom works too.

Shivam

Notes

- The CEO short version fits inside the 300-character connection-request limit. The PM short version does too.
- If LinkedIn won't let you message either without a connection, send the short version as the connect-with-note, then send the long version as a follow-up once the request is accepted.
- Mention the application explicitly in both versions so context lands fast.
- Same human-tone rules as the resume: no em-dashes, contractions are fine, specific is better than generic.
