

LinkedIn Messages: Freed Product Manager

Personalized DMs for Freed's co-founders. Erez is the most likely hiring decision-maker; Andrey is the technical co-founder.

Erez Druk, CEO and Co-founder of Freed (ex-Meta)

Short (connection request)

Hi Erez, just applied to the PM role at Freed. I'm the first AI hire at ESC, where Maya AI gives utility supervisors hours of their day back (100+ emails removed per supervisor per day). Same product motion as Freed for clinicians. Would love to connect.

Hi Erez,

Just applied to the PM role at Freed. Reaching out because the work you're doing for clinicians is the same product motion I've been shipping for utility supervisors at ESC, and I think the substance match is worth a direct note.

I'm the first AI hire at ESC Partners. Built Maya AI from scratch in 2.5 months on Claude Code: an autonomous AI agent on Oracle CCS for a 200K-resident utility. Maya removes 100+ manual emails per supervisor per day and projects around \$225K per month in operational lift. The product motion is identical to Freed's: AI as a workflow co-pilot for a non-technical expert who's drowning in administrative load.

What I haven't done: shipped to clinicians directly. What I have done: customer discovery with utility supervisors, mapped Oracle CCS workflows into a one-page narrative, then shipped the AI that compressed three-day support cycles to minutes. Healthcare is a different vertical, same product motion.

Before ESC, I was sole PM on Vollie's 0-to-1 voice AI coaching platform. Before that, I bootstrapped CloudApproach and Approachables across UK and MENA (\$575K combined exit, 95% retention). Founder is the only mode I've operated in.

I use AI as a core part of how I work, not just what I build. Daily Claude Code operator. PRDs as Claude conversations first.

Would love 15 minutes if there's room. Happy to share a 30-day clinician-shadowing plan or walk through Maya AI in code.

Shivam

Andrey Bannikov, Co-founder of Freed (ex-Meta engineer)

Short (connection request)

Hi Andrey, just applied to the PM role at Freed. I'm a hands-on AI builder (Maya AI on Bedrock + FastAPI + React for 200K residents, 2.5 months solo) and I'd love 15 minutes to hear how the technical stack and product muscle interplay at Freed. Would love to connect.

Hi Andrey,

Just applied to the PM role at Freed. Reaching out because I'm the kind of PM who lives in the codebase, and I'd love 15 minutes to hear how the engineering and product motion interplay at Freed.

I'm the first AI hire at ESC Partners. Built Maya AI from scratch in 2.5 months on Claude Code: an autonomous agent on Oracle CCS for a 200K-resident utility. I wrote the FastAPI handlers, designed the Bedrock prompts across Opus, Sonnet, and Nova, shipped the React supervisor cockpit, and built the Microsoft Teams adaptive-card approval flow. No engineering team. Sole AI hire.

The 100+ emails per day Maya removes for utility supervisors is the same kind of administrative compression Freed delivers to clinicians.

Before ESC, two prior exits across UK and MENA (\$575K combined). Founder mode.

Would love 15 minutes whenever there's room. Happy to walk through Maya AI's stack and the eval framework in code.
