

Dear Glean Team,

Just applied to the PM, AI Quality role for Glean Model Hub. Sending this because the JD describes the work I already ship every day at ESC Partners, and I want to make sure it lands.

I'm the first AI hire at ESC, where I built **Maya AI** from scratch in **2.5 months** on Claude Code: an autonomous, event-driven agent platform on Oracle CCS for a **200K-resident utility**. Maya runs production traffic through **AWS Bedrock**, routing across Claude Opus, Sonnet, and Nova based on intent, confidence, and cost-per-call. The supervisor cockpit I built on top of it tracks sentiment, takeover frequency, and confidence as service-level objectives, with one-click human takeover when the model is uncertain. It's essentially the customer-side version of Glean Model Hub: choose the right LLM, route the traffic, observe the quality, surface the cost, give the operator a clean override.

Where I have less direct tenure is leading LLM provider contracts. I haven't negotiated a Bedrock or 11 Labs deal. But I've shipped the multi-provider routing layer that the contract governs, plus the two-phase pre-filter at SALL that cut **API costs by 70%** on the same model class. The procurement conversation is the layer above what I have built, and I have the technical context to lead it.

Before ESC, I was sole PM on Vollie's 0-to-1 voice AI coaching platform (first paying client, seed milestone). Before that, I bootstrapped **CloudApproach and Approachables** across UK and MENA. Two ventures, **\$575K combined exit, 95% post-acquisition retention, \$5M+** in deals influenced. Founder mode is the only mode I've ever run in.

For the AI-first exercise in the interview process, I'm happy to walk through Maya AI's routing layer in code, share a one-page Day 1 framework for Model Hub, or bring a take-home that maps Maya's confidence-and-cost tradeoffs to Glean's. Whichever is most useful.

Available immediately. Open to relocating to San Francisco within 30 days of offer.
