

LinkedIn Messages: Guild.ai, Product Manager

Personalized DMs for the people most likely to move this application forward. Short version fits a LinkedIn connection-request note; long version is for InMail or a post-connection follow-up.

James Everingham, Founder & CEO of Guild.ai

Short (connection request)

Hi James, just applied to Guild's first-PM role. For the past six months at ESC I've been shipping the customer-side analog of your control plane: Maya AI on Oracle CCS, autonomous agents with HITL takeover, live at a 200K-resident utility. Built in 2.5 months as sole AI. Would love to connect.

Long (InMail or post-connection)

Hi James,

Just applied to Guild's first-PM role. Reaching out because the bet you're making is the one I've already been making one customer at a time, and I'd love to make sure the application doesn't get lost in the stack.

Six months ago I joined ESC Partners as the first AI hire. Built Maya AI from scratch in 2.5 months on Claude Code: an autonomous, event-driven agent platform on Oracle CCS for a 200K-resident utility. The supervisor cockpit I built sits on top of every agent action with identity, audit, takeover, and observability. It's the local version of what Guild is shipping at platform scale.

Before ESC, two prior exits across UK and MENA (\$575K combined, 95% post-acquisition retention). Founder's the only mode I've ever run in.

Congratulations on the Series A, by the way. The Khosla-led round and the control-plane positioning is exactly where this category needed to land. Would love 15 minutes if there's room. Happy to walk through Maya AI in code or share whatever's useful.

Shivam

Notes

- Guild's job page on Ashby did not list specific hiring-team contacts beyond the role itself. James is the named CEO and the single highest-impact recipient.
- Optional second target: anyone at Khosla Ventures who covers Guild. They sometimes warm-intro to portfolio CEOs. Search "Khosla Ventures Guild.ai investor" before reaching out cold.
- Mention the application explicitly in both versions so context lands fast.
- Same human-tone rules as the resume: no em-dashes, contractions are fine, specific is better than generic.
