

LinkedIn Messages: OpenAI Product Manager API Agents

Personalized DMs for OpenAI leadership most likely to move this application forward. The LinkedIn page did not surface a named hiring contact for this seat, so these target the broader API team leadership.

Olivier Godement, Head of Product, API at OpenAI

Short (connection request)

Hi Olivier, just applied to the PM, API Agents role on your team. I'm the first AI hire at ESC, where Maya AI runs production traffic through Bedrock across Opus, Sonnet, Nova for a 200K-resident utility. Customer-side analog of the primitives your team builds. Would love to connect.

Hi Olivier,

Just applied to the PM, API Agents role on your team. Reaching out because the JD describes the work I have been shipping for one customer at a time at ESC, and I want to make sure the application doesn't get lost in the stack.

I'm the first AI hire at ESC Partners. Built Maya AI from scratch in 2.5 months on Claude Code: an autonomous, event-driven agent platform on Oracle CCS for a 200K-resident utility. Maya routes production traffic through AWS Bedrock across Claude Opus, Sonnet, and Nova based on intent, confidence, and cost-per-call. The supervisor cockpit tracks sentiment, takeover frequency, and confidence as service-level objectives. It's the customer-side version of the agentic primitives your team builds at platform scale.

Before ESC, I bootstrapped and exited two ventures across UK and MENA (\$575K combined, 95% post-acquisition retention). Founder mode is the only mode I've ever run in.

Would love 15 minutes if there's room. Happy to walk through Maya AI's routing layer in code or bring a Day 1 framework for the Agents API.

Shivam

Sherwin Wu, Head of Engineering, API at OpenAI

Short (connection request)

Hi Sherwin, just applied to the PM, API Agents role. I build for AI engineers at ESC (Maya AI: Bedrock routing, FastAPI handlers, supervisor cockpit, 17 admin APIs, all shipped in 2.5 months as sole AI). Same product surface, customer-side. Would love to connect.

Hi Sherwin,

Just applied to the PM, API Agents role on the API team. Reaching out because I think the substance match is uncommon enough to be worth a direct note.

For the past six months at ESC Partners, I've been the first AI hire. I built Maya AI from scratch in 2.5 months on Claude Code: an autonomous agent on Oracle CCS for a 200K-resident utility. 17 admin APIs with key rotation and multi-tenant governance. FastAPI orchestration. Bedrock routing across Claude Opus, Sonnet, and Nova. Supervisor cockpit on top with one-click human takeover. The integration layer is identical to what an OpenAI API customer is trying to build, just from the customer side.

Before ESC, two prior exits across UK and MENA (\$575K combined). Founder's the only mode I've operated in.

Would love 15 minutes whenever there's room. Happy to walk through the API surface in code.
