

LinkedIn Messages: Plaud Agent Product Manager Agent Tools

Same Plaud contacts as the parent listing (4374533620). One combined outreach to Tony Pan and Nathan Xu covers both roles.

Tony Pan, Product Director at PLAUD.ai (LinkedIn-named hiring contact for parent posting)

Short (connection request)

Hi Tony, just applied to the Agent PM, Agent Tools seat at Plaud (applied to the parent Agent PM role too). I'm the first AI hire at ESC, shipping Maya AI's tool-use, Bedrock routing, and supervisor cockpit. Customer-side version of your ecosystem. Would love to connect.

Hi Tony,

Just applied to the Agent PM, Agent Tools role at Plaud. Also applied to the broader Agent PM seat (4374533620) since the JDs are near-identical and I wanted to make sure I reached the right hiring loop.

I'm the first AI hire at ESC Partners. Built Maya AI from scratch in 2.5 months on Claude Code: autonomous agent platform on Oracle CCS for a 200K-resident utility. Tool-use design across Claude Opus, Sonnet, and Nova on Bedrock. Supervisor cockpit with one-click takeover. Eval framework (confidence + sentiment + takeover frequency as SLOs). It's the customer-side version of what Plaud Agent Tools is building.

Before ESC, two exits across UK and MENA (\$575K combined). Founder mode is how I've always operated.

Would love 15 minutes if there's room. Happy to bring a one-page schema design for a Plaud agent tool, or walk through Maya AI's tool layer in code.

Shivam

Nathan Xu, CEO and Co-founder of Plaud

Hi Nathan, applied to the Agent Tools PM seat at Plaud (and the parent Agent PM role). \$250M ARR bootstrapped in three years is the builder's story I want to be part of. Shipping the customer-side version at ESC right now. Would love to connect.

Hi Nathan,

Just applied to the Agent Tools PM role at Plaud (and the broader Agent PM seat). Reaching out because the company you've built is exactly where I want to be: \$250M ARR bootstrapped, 1.5M+ devices, 170 countries.

I'm the first AI hire at ESC Partners. Built Maya AI from scratch in 2.5 months: autonomous agent on Oracle CCS for a 200K-resident utility. Bedrock routing, supervisor cockpit, confidence-as-SLO eval framework.

Local-scale version of Plaud's agent tooling.

Before ESC, two exits across UK and MENA (\$575K combined, 95% retention). Founder is the only mode I've operated in.

Would love 15 minutes whenever there's room.
