

LinkedIn Messages: Plaud Agent Product Manager

Personalized DMs for the two Plaud contacts named on the LinkedIn job page plus the CEO.

Tony Pan, Product Director at PLAUD.ai (LinkedIn-named hiring contact)

Short (connection request)

Hi Tony, just applied to the Agent PM role at Plaud. I'm the first AI hire at ESC, where Maya AI's tool-use, supervisor cockpit, and Bedrock routing (Opus/Sonnet/Nova) for a 200K-resident utility look a lot like the ecosystem your team is architecting. Would love to connect.

Hi Tony,

Just applied to the Agent Product Manager role. Reaching out because the JD describes the loop I run every day at ESC, and I want to make sure the application lands with you.

I'm the first AI hire at ESC Partners. Built Maya AI from scratch in 2.5 months on Claude Code: an autonomous agent platform on Oracle CCS for a 200K-resident utility. The tool-use design across Claude Opus, Sonnet, and Nova on Bedrock, the supervisor cockpit with one-click human takeover, and the eval framework (confidence + sentiment + takeover frequency as SLOs) are the customer-side version of what "Architect the Plaud Agent Tooling Ecosystem" describes.

JSON Schemas at Plaud scale would be new for me, but I've shipped structured tool-use in production plus 17 admin APIs and a 3-workflow agentic pipeline on n8n. The schema formalism is a week of ramp.

Before ESC, two exits across UK and MENA (\$575K combined, 95% post-acquisition retention). Founder is the only mode I've operated in.

Would love 15 minutes if there's room. Happy to bring a one-page schema design for a Plaud agent tool.

Shivam

Nathan Xu, CEO and Co-founder of Plaud

Short (connection request)

Hi Nathan, just applied to the Agent PM role at Plaud. \$250M ARR bootstrapped in three years is a builder's story I want to be part of. I'm shipping the customer-side version of Plaud's tooling ecosystem at ESC right now. Would love to connect.

Hi Nathan,

Just applied to the Agent PM role at Plaud. Reaching out because the company you've built is the kind I want to be inside next: \$250M ARR bootstrapped in three years, hardware + software, 1.5M+ devices, 170 countries. That's a builder's story.

I'm the first AI hire at ESC Partners. Built Maya AI from scratch in 2.5 months on Claude Code: an autonomous agent on Oracle CCS for a 200K-resident utility. Bedrock routing across Claude Opus, Sonnet, and Nova. Supervisor cockpit with one-click takeover. Confidence and takeover frequency as SLOs. It's the local-scale version of what Plaud is doing.

Before ESC, two exits across UK and MENA (\$575K combined, 95% retention). Founder is how I've operated my whole career.

Would love 15 minutes whenever there's room. Happy to walk through Maya AI in code or share whatever's useful.
