

LinkedIn Messages: Sarvam AI Product Manager Models

Personalized DMs for Sarvam's two co-founders. Sarvam's careers page did not list a hiring contact for this seat, so the founders are the right entry points. Pratyush is the more reachable + technical; Vivek is the more public-facing.

Pratyush Kumar, Co-founder of Sarvam AI (ex-AI4Bharat, ex-IBM Research)

Short (connection request)

Hi Pratyush, just applied to the Model PM role at Sarvam. I'm the first AI hire at ESC, where Maya AI runs 26-language voice on 11 Labs plus a Bedrock routing + eval framework (confidence + sentiment + takeover as SLOs) for a 200K-resident utility. Customer-side analog of the Model PM charter. Would love to connect.

Hi Pratyush,

Just applied to the Product Manager (Models) role at Sarvam. Reaching out because the JD describes the work I have been shipping at smaller scale at ESC, and I would love to have a quick conversation before going deeper.

I'm the first AI hire at ESC Partners. Built Maya AI from scratch in 2.5 months on Claude Code: an autonomous, event-driven agent platform on Oracle CCS for a 200K-resident utility. The voice surface runs on 11 Labs with 26-language coverage. The routing layer evaluates Bedrock model selection across Claude Opus, Sonnet, and Nova. The eval framework tracks confidence, sentiment, and takeover frequency as service-level objectives. The supervisor cockpit gives non-technical operators a one-click override.

What I have not done: authored in-house ASR or TTS training pipelines. What I have done: shipped production speech surfaces, evaluated their quality continuously (latency, comprehension, takeover rate), and lifted XGBoost accuracy from 62% to 73% with SHAP-attributed explainability on a Simon Vision engagement. WER / CER / MOS is a one-week ramp.

Before ESC, I bootstrapped and exited two ventures across UK and MENA (\$575K combined exit, 95% post-acquisition retention). Founder mode is how I have always operated.

One open question I would value your honest read on: the JD says Bengaluru on-site. I am US-based on STEM OPT, willing to relocate for the right role, but would love to know if there is any remote-from-US flexibility in the first 6 to 12 months. Either way, the substance match is real and I would rather have the conversation early.

Shivam

Vivek Raghavan, Co-founder and CEO of Sarvam AI (ex-AI4Bharat, ex-CPM UIDAI/Aadhaar)

Short (connection request)

Hi Vivek, just applied to the Model PM role at Sarvam. The Aadhaar architecture work is one of the public-infrastructure builds I have studied most closely. I'm shipping a customer-side version of Sarvam's voice + eval charter at ESC (Maya AI, 26-language, 200K residents). Would love to connect.

Long (InMail or post-connection)

Hi Vivek,

Just applied to the Product Manager (Models) role at Sarvam. Reaching out because Sarvam is the public-infrastructure-scale bet I want to be inside next, and the substance match between the JD and the work I run at ESC is uncommonly clean.

I am the first AI hire at ESC Partners. Built Maya AI from scratch in 2.5 months on Claude Code: an autonomous agent on Oracle CCS for a 200K-resident utility. 26-language voice on 11 Labs, Bedrock routing across Claude Opus, Sonnet, Nova, and an eval framework with confidence + sentiment + takeover frequency tracked as service-level objectives. It is the customer-side version of what Sarvam's Model PM owns at platform scale.

Before ESC, I bootstrapped and exited two ventures across UK and MENA (\$575K combined exit, 95% post-acquisition retention). Founder mode is the only mode I have ever operated in.

The Aadhaar architecture work you led at UIDAI is one of the public-infrastructure builds I have studied most closely. Indic-first AI at sovereign scale is the next chapter of that story, and I would love a chance to contribute.

One honest question for screen one: the JD lists Bengaluru on-site. I am US-based on STEM OPT through 2027, willing to relocate, but would love to know if the seat has any remote-from-US flexibility in the first 6 to 12 months as the team ramps. Either way, I would rather raise it now than later.

Shivam

Notes

- Pratyush is more technical and tends to engage on substance; lead with him.
- Vivek is more public-facing and senior; the Aadhaar reference is the genuine personal anchor.
- The Bengaluru-on-site question is non-trivial. Do not bury it. Surface it in the first message so neither side wastes time.
- Mention the application explicitly in every version so context lands fast.
