

LinkedIn Messages: Valdera Product Manager

Personalized DMs for Valdera's co-founders. The posting is 8 months old, so a direct DM to confirm the role is still open is the right first move before deep investment.

Sruti Arulmani, CEO and Co-founder of Valdera

Short (connection request)

Hi Sruti, just applied to the PM role at Valdera. The posting is 8 months old on LinkedIn, so reaching out to confirm the seat is still active. I'm shipping AI-native autonomous agents at ESC on Oracle CCS for a 200K-resident utility. Would love to connect.

Hi Sruti,

Just applied to the PM role at Valdera. The LinkedIn posting is 8 months old, so I wanted to reach out directly and confirm the seat is still active before going deeper on the interview prep.

I'm the first AI hire at ESC Partners. Built Maya AI from scratch in 2.5 months on Claude Code: an autonomous, event-driven agent platform on Oracle CCS for a 200K-resident utility. Bedrock routing across Claude Opus, Sonnet, and Nova. Supervisor cockpit with one-click takeover. The product motion is identical to what Valdera describes: ship AI-native autonomous agents into a vertical that runs on legacy data and processes, with a craftsmanship bar on every detail of the experience.

I haven't worked in chemicals or raw materials sourcing, but the vertical-AI generalist motion is the same. 30-day plan for week one if I'm the first PM: shadow five sourcing managers at Fortune 500 manufacturers, ride along on real RFP cycles, then map the workflow into a one-page narrative.

Before ESC, I bootstrapped and exited two ventures across UK and MENA (\$575K combined). Founder mode is the only mode I've ever operated in.

Would love 15 minutes if the role is still live. If not, I'd love to hear when the next PM seat might open at Valdera.

Hi Dheev, just applied to the PM role at Valdera. Confirming the 8-month-old posting is still live and introducing myself: first AI hire at ESC, shipping autonomous agents on Oracle CCS for a 200K-resident utility. Would love to connect.

Hi Dheev,

Just applied to the PM role at Valdera. The LinkedIn posting is 8 months old, so I wanted to introduce myself directly in case the search is back open or has been informally re-scoped.

I'm the first AI hire at ESC Partners. Built Maya AI from scratch in 2.5 months on Claude Code: autonomous agent platform on Oracle CCS for a 200K-resident utility. Bedrock routing, supervisor cockpit, confidence-routing. The product motion is identical to what Valdera describes: AI-native autonomous agents on top of a legacy vertical.

Before ESC, two prior exits across UK and MENA (\$575K combined). Founder mode.

Would love 15 minutes if the role is still live.
